UNITED FOR CLIMATE

AUTUMN WINTER 24/25

GUIDING THEME SUSTAINABILITY

The claim "**United For Climate In Textiles**" refers to the collective effort within the textile industry to effectively address the environmental impacts and challenges associated with climate change. Texhibition **Autumn/Winter 2024-25** is also themed "**United For Climate In Textiles**" and aims to inspire action and foster a sense of shared responsibility for the future of our planet and future generations. For Texhibition, the focus is on participants meeting sustainable criteria. For this reason, the limited exhibition space will only be allocated to those who meet precisely these criteria.

TREND SCOUTS

Texhibition also showcased the latest fashion trends for **autumn/winter 2024-2025** in **the Trend Area**, which serves as a showcase for the fair. Curated by internationally renowned Turkish designer **Idil Tarzi**, exhibitors and visitors found inspiration for innovative developments in fashion production, with a special focus on sustainability. Thematically, the Trend Area was divided into **Reconceptual Beauté** (alternative well-being), **Mindful Escapes** (wellness), **Serenity** (natural and organic textiles in a tranquil ambience), **Eco Revolution** (desire for a life in harmony with our planet), **LuminoNoctris** (glitter and shine), **Digital Uprise** (intelligent and functional textiles), **Environmental Activism** (call for environmental activism), **Vanguard Movement** (new materials and new aesthetics). All areas addressed the relationship between people and the environment.
